EXAMINER

GHATT, DAVE A

ART UNIT

PAPER NUMBER

2854

DATE MAILED: 06/28/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/602,776

Applicant(s)

SUZUKI ET AL.

Examiner

Dave A Ghatt

Art Unit

2854

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 25 June 2003.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-19 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-8, 11, 12 and 14-19 is/are rejected.  
7) ☒ Claim(s) 9, 10 and 13 is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
10) ☒ The drawing(s) filed on 06-25-03 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☒ All b) ☐ Some \* c) ☐ None of:  
1. ☒ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Claim Objections*

1. Claims 1-19 are objected to because of the following informalities: In claim 1 line 3, the applicant uses the language, "forming a first image on *the* paper." Maybe the applicant meant, "forming a first image on *a* paper." Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 4, 7, 8, 11, 12, 14, 15, 16, 17, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Manzer et al. (US 6,256,463). Figures 2 and 12 of Manzer et al. teach the claimed invention. As illustrated in Figure 5, Manzer et al. teaches, an image forming apparatus comprising, a first image forming unit 11 having a first printing section (not numbered) for forming a first image on a paper. As illustrated in Figures 2 and 12, and as outlined in column 11 lines 34-38, Manzer et al. also teaches a second image forming unit 10 having a second printing section (22, D1) for forming a second image on the paper. Figure 2 illustrates a paper-conveying unit 16 (and Figure 12 a paper conveying unit 49) for conveying the paper from the first image-forming unit 11 to the second image-forming unit 10. See also column 7 lines 55-65.

Art Unit: 2854

With respect to claims 3 and 8, as outlined in column 7 lines 55-65, Manzer et al. teaches the second image forming unit 10 to use one recording medium (monochromatic) and the first image forming unit 11 to use a different recording medium (color).

With respect to claims 4 and 8, as outlined in column 7 lines 23-39, Manzer et al. teaches the printers to be electrographic printers, all of which use some type of toner.

With respect to claim 7, as outlined in column 7 lines 55-65, Manzer et al. teach the use of color in the first image forming unit 11.

With respect to claim 11, column 13 lines 5-25 of Manzer et al. teach the second image forming unit 10 having a second reversing section (W4, W2) for reversing the paper on which the second image is formed, and for delivering the paper to the second printing section D1.

With respect to claim 12, column 13 line 21 teaches the second image forming unit 10 forming a fourth image on the paper delivered from the second reversing section (W4, W2).

With respect to claim 14, as illustrated in Figure 12, the paper conveying unit 49 includes a first conveyance passage (44, 47) for passing the paper from the first image forming unit 11 to the second image forming unit 10, and a second conveyance passage 48 connected to the first conveyance passage, for transmitting the paper to the outside. See column 12 lines 19-25 teaching the use of passage 48 for directing paper to the outside.

With respect to claim 15, as illustrated in Figure 2, Manzer et al. teaches the first image forming unit 11 having a first paper supply 15 for supplying paper to the first printing section, and the second image forming unit 10 having a second paper supply section 14 for supplying paper to the second printing section 22.

Art Unit: 2854

With respect to claim 16, Figures 2 and 12 of Manzer et al. teach the first image forming unit 11 and the second image-forming unit 10, detachable from the paper conveying unit (16, 49).

With respect to claim 17, the Manzer et al. teaches the first image forming unit 11 and the second image forming unit 10 capable of forming an image on the paper and outputting the paper independently.

With respect to claim 18, insofar as structure is outlined, Manzer et al. teaches the claimed invention. In view of the modular structure illustrated in Figure 1, the first printing unit 11 (and therefore the first printing section) and the second printing unit 10 (and therefore the second printing section) are exchangeable.

With respect to claim 19, again, insofar as structure is recited, Manzer et al. teaches the claimed invention as recited in the rejection to claim 1. The apparatus of Manzer et al. is also capable of performing the functions outlined in claim 19.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Manzer et al. (US 6,256,463) in view of Horie et al. (US 5,208,640). As outlined in the above rejection to claim 1, Manzer et al. teaches all the claimed structure, except Manzer et al. does not teach the first and

Art Unit: 2854

second printing units using the same recording material. Horie et al. teaches a printing device similar to that of Manzer et al. As illustrated in Figure 3, Horie et al. teaches, an image forming apparatus comprising, a first image forming unit 30c having a first printing section LM for forming a first image on a paper. As illustrated in Figure 3 Horie et al. also teaches a second image forming unit 30b having a second printing section MM for forming a second image on the paper. The first and second printing units of Horie et al. use the same recording material. To one of ordinary skill in the art, it would have been obvious to use printing units with the same recording material, as taught by Horie et al., in the invention of Manzer et al., in order to provide similar prints simultaneously, as taught in the Abstract Horie et al.

6. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Manzer et al. (US 6,256,463) in view of Nonomura et al. (US 6,389,253). As outlined in the above rejection to claim 1, Manzer et al. teaches all the claimed structure, except Manzer et al. is silent on whether the toner used is ferronmagnetic, non-magnetic toner, or both. Nonomura et al. teaches a printer similar to that of Manzer et al. As outlined in column 14 lines 17-20, the apparatus of Nonomura et al. may use magnetic and non-magnetic toner. To one of ordinary skill in the art, it would have been obvious to use magnetic toner, non-magnetic toner, or a combination thereof (as recited in claims 5 and 6), as a simple substitution of one known toner for another, because both types of toner are known to produce similar effect and action, as taught by Nonomura et al. in column 14 lines 17-20.

***Allowable Subject Matter***

Art Unit: 2854

7. Claims 9, 10, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 9 is indicated allowable because the prior art of record does not teach or render obvious the total combination for a printer including, a paper conveying unit for conveying the paper from the first image forming unit to the second image forming unit, wherein the first image forming unit has a first reversing section for reversing the paper on which the first image is formed and for delivering the paper to the first printing section or the paper conveying unit.

Claim 13 is indicated allowable because the prior art of record does not teach or render obvious the total combination for a printer including, wherein the second image forming unit includes a first conveyance passage for transmitting the paper delivered from the paper conveying unit via the second printing section to the outside, and a second conveyance passage connected to the first conveyance passage, for transmitting the paper to the outside so as to bypass the second printing section.

### ***Conclusion***

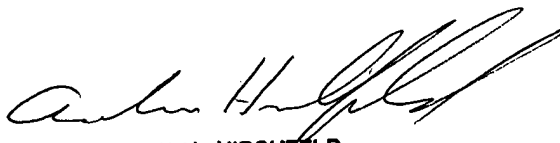

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave A Ghatt whose telephone number is (571) 272-2165. The examiner can normally be reached on Mondays through Friday 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew H Hirshfeld can be reached on (571) 272-2168. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
